Open Market's OM-SecureLink to be Embedded
into SAQQARA Step Search to

Build Online Catalogs with Transaction Capabilities

SUNNYVALE, Calif., May 15 /PRNewswire/ -- SAQQARA Systems, creators of advanced Internet search technology and catalog authoring software, today announced a partnership with Open Market, a leading provider of Internet software for business, to bring electronic transaction capabilities to interactive online catalogs. Under terms of the agreement, Open Market's SecureLink technology will be embedded into SAQQARA Systems Step Search software. Step Search enables companies to build a customized electronic catalog at their Web site. OM-SecureLink is commerce-enabling technology that connects a merchant's storefront to a back-office transaction management system. Together Open Market and SAQQARA can provide businesses the means to create a complete online marketplace.

"SAQQARA's StepSearch is a natural fit for OM-SecureLink," said Gary Eichhorn, Open Market's president and CEO. "By uniting these two powerful Internet software products, it will now be quicker and easier for Web site developers to build interactive online catalogs for Internet commerce."

SAQQARA has integrated the OM-SecureLink software into its Step Search product to automatically generate "Digital Offers" from a Step Search catalog. Step Search enables merchants to author and publish on-line catalogs as part of a Web site store front design. In cooperation with Open Market's Internet Commerce Initiative, Saqqara serves as an Independent Software Vendor that has integrated OM SecureLink to provide tools for

Internet Service Providers and Web developers alike to create commercial marketplaces on the Internet.

With Step Search, Web sites can now include a cost-effective and easily maintained catalog delivery system. Step Search Builder allows businesses to host a catalog for a merchant and provide authoring tools to allow a merchant to create and maintain a catalog remotely.

"Electronic commerce can only succeed if online customers can easily identify the exact item that fits their needs and then purchase it through an easy-to-use and secure transaction system," said Sherif Danish, chairman and CEO of SAQQARA Systems. "With Open Market's OM-SecureLink embedded in Step Search, businesses can create catalogs that not only guide a user to a buying decision but actually complete the transaction at the same time."

Active Computing

Step Search takes online catalogs beyond marketing storefronts or static information repositories and enables companies to help individual customers in comparing features and benefits of a product line. Step Search brings "active computing" to the Web, filtering information and guiding the user toward real-world answers as catalog pages are generated "on the fly" from a database of information.

Availability

An evaluation copy of Step Search is available now on the SAQQARA Web site at www.saqqara.com. For more information and product sales, call SAQQARA sales directly at 408-738-4858.

About Open Market

Founded in 1994, Open Market, Inc. offers a full spectrum of high-performance business software products for the Internet. These products are revolutionary in their architecture, breadth and functionality -- and enable companies to re-invent the way they do business in the information economy. Open Market's software products bring the full range of business capability to the Internet and make enterprise-wide applications, secure electronic commerce and industry-specific solutions possible. The company, headquartered in Cambridge, MA, can be reached at 617-621-9500 or on the World Wide Web at <http://www.openmarket.com>.

About SAQQARA Systems

SAQQARA Systems aims to be the leading provider of World Wide Web tools and technologies to provide businesses with solutions to create online catalogs. As a result of several years of experience managing and

delivering online product information for Fortune 500 companies, SAQQARA Systems created Step Search to help businesses develop efficient, systematic and customer-responsive catalogs, while providing a predictable, graphical interface for customers on the World Wide Web. Web sites employing Step Search, SAQQARA's patent-pending catalog authoring and publishing software, offer customers accurate and up-to-date product data, instantaneous feedback and online sales guidance. For more information and a demonstration of Step Search, explore SAQQARA on the World Wide Web at <http://www.saqqara.com> or call 408-738-4858.
